## **Frontier Cooperative Announces CNG Venture**

Committed to providing CNG to its patrons and the Columbus Marketplace

**Brainard, NE** – Frontier Coop embarked on a pilot project 18 months ago with Three Rivers Energy Company utilizing conversion kits and time-fill compressors provided by Three Rivers Energy. This pilot project showed substantial savings, which if applied to a larger portion of their fleet, could result in a significant amount of savings to Frontier Coop. These results prompted Frontier Coop to make a commitment to deliver CNG (Compressed Natural Gas) to their customers.

This spring, Frontier Coop announced a joint venture with Stirk CNG to build a fast fill CNG station in Columbus, NE. In addition, Frontier Coop has committed to add more time-fill stations and truck conversions utilizing the Three Rivers Energy system.

“This balanced approach to delivering CNG to our patrons will keep Frontier Coop on the leading edge of providing opportunities to its communities and customers,” stated Jeff Ingalls, Fuel Division Manager, Frontier Coop.

Frontier Coop is a full-service cooperative with 22 locations serving east-central Nebraska, with the home office located in Brainard, NE. Frontier Coop offers products and services in grain, agronomy, fuel, feed, and seed.
